Insights Magazine & Chemical Week

Authoritative and engaging content to draw attention to what matters to you most.

Insights & Chemical Week are distributed to event delegates and digital for increased circulation.

- **Insights Magazine** captures timely perspectives and trends driving the energy markets, drawing on the knowledge and expertise of S&P Global Energy Insights thought leaders.

→ Published 6 times a year
[2026 Editorial Calendar](#)

- **Chemical Week Magazine** has been the leading news source for chemical industry executives and professionals around the globe for over 100 years.

→ Published 26 times a year

Executive Conversations & Webinars

Establish your organization as an authoritative voice

Chaired by a S&P Global Energy expert, our interviews and webinars focus on the disruptive transformations reshaping the industry.

Production

- Align webcast topic/interview with relevant industry event and editorial calendar (Insights Magazine or Chemical Week)
- Marketing of event:
 - Featured on digital publication and relevant digital channels (audience 35,000)
 - 3 Email campaigns to tailored target audience (potential reach 35,000)
 - Social media distribution (130,000+ followers)
- Virtual event production
- Leads and metrics are shared with sponsor

Conferences Spotlight

Leverage the unrivalled S&P Global Energy brand and audiences to deliver your organization’s message.

Sponsored Content

S&P Global Commodity Insights

Conferences Spotlight

Connecting with purpose to navigate market disruption

Dear Catherine,

The energy and commodities landscape is experiencing fundamental transformation. AI data centers are rewriting power demand forecasts, driving unprecedented investment needs across US electricity infrastructure. Biofuels and feedstock markets, meanwhile, face regulatory whiplash as conflicting mandates create supply-demand imbalances and expose vulnerabilities in global supply chains.

These shifts require strategic recalibration. Companies that navigate this complexity successfully will secure competitive advantages. These essential conversations will be front and center at our upcoming conferences in October and early November, where industry leaders will gather to address these challenges head-on.

Our experts cut through the noise to deliver the strategic intelligence you need. In the videos below, S&P Global Commodity Insights leaders share market insight as a preview to the discussions you'll find at [World Hydrogen Week](#) (October 6-10, Copenhagen), [Nodal Trader Conference](#) (October 22-24, Washington), [Financing US Power](#) (October 27-29, Houston), and [World Biofuels, Ethanol & Feedstocks Conference](#) (November 3-5, Barcelona).

Financing US Power Conference | Houston, October 27-29

AI investment charges power landscape

Hill Vaden

Executive Director
S&P Global Commodity Insights

AI investment charges power landscape

The US power sector confronts unprecedented electricity demand growth as AI data centers and electrification drive massive capital investment needs across generation, transmission, and grid infrastructure, notes Hill Vaden, executive director of energy capital insights with S&P Global Commodity Insights.

How are chemicals companies preparing for net zero?

In HSBC's latest global Transition Pathways survey, we asked 375 businesses across the chemicals and industrial ecosystem for their views on the transition. Nearly half of chemicals companies are already reporting scope 3 emissions, compared to 37% of manufacturers overall. Explore the full findings to gain insights into how companies in the sector are investing, what actions they're taking to reduce emissions and what is holding them back.

Analysis

CIA seals lower energy-efficiency target for UK chemical sector

The Chemical Industry Association (CIA), London, said it has negotiated a deal with the UK government of a 10% energy efficiency target previously planned for the 10% chemical sector by 2025. The deal targets the efficiency of the process for the UK chemical industry by 2025.

Price trends: Monday, September 22, 2025

Market analysis: Chemicals began last week following the strong demand for chemicals in the US and Europe. The market is looking for a recovery in demand, but the market is looking down on the market for oil on the second half of the year. Global stock closed early on 22nd Sept.

Creating Materials Format — PDF

Press-quality Acrobat Distiller settings are necessary to maintain high quality. We can work with PDF/X or most other accepted press-ready settings. All fonts must be embedded, and all colors converted to CMYK. Our printer's distiller settings can be emailed to you upon request.

Submitting Materials Electronic Delivery

PDFs less than 8MB may be emailed to Advertising@spglobal.com. Other electronic materials and PDFs too large to email should be sent via a file transfer site such as WeTransfer.com. Please compress all folders into a single file (.zip, .sit, etc.). Be sure to include a PDF proof of the ad, so we know what the final file should look like.

Half-page island (no bleeds or marks)	186 mm x 122 mm
Quarter-page horizontal	60 mm x 186

Non-standard size: ask your sales manager for details

Notes: Format — PDF

- **Full page ads require** at least 1/8-inch (3.175mm) bleed on all sides, unless noted otherwise. Include type/logos and other important subject matter at least ¼-inch (6.35mm) inside trim lines on all sides to avoid loss of content during trimming.
- Supply **fractional ads** to exact dimensions with background/images or a border line defining the space. No crops or printer marks will be necessary.
- Supply **advertorial pages** marked as such, or as custom publication.

Submitting Materials Electronic Delivery

- Send uncompressed files up to 10 MB to george.bourous@spglobal.com.
- Submit all ads in CMYK color mode, high-resolution press PDF files with fonts embedded.
- Convert any PMS, SPOT, RGB colors to process/CMYK before creating PDF.
- Art elements/images within PDF should be at least 300 true dpi at 100% size, and in CMYK mode.
- Do not send any PNG/JPG/JPEG or any other compressed file.
- Set crops to trim size and offset crops outside bleed area full-page art with bleeds.
- Provide PDF at 100% ad size for full page art with no bleeds and for all fractional ads. No need for crops or printer's marks.
- Ad materials are due 10 business days prior to issue date (the latter date of bi-weekly issue). *Earlier due dates are needed for multiple page campaigns, therefore please contact your sales representative for further details.*
